

# Homeowners Petition Concerning Replacement Technology for Septic Systems

We are concerned homeowners within (subdivision) \_\_\_\_\_ and residents of \_\_\_\_\_ County Florida who urge our government to act now to provide a non-electric replacement for our septic systems in compliance with Florida's Statute Section 403.067(7).

We urge our State Government to provide replacement options, whether sewers or nitrogen reducing septic systems that function using only natural gravity. Solutions must not contain pumps or other components dependent on the homeowner providing continued access to electrical power. We believe non-passive solutions jeopardize our health, our property and property values.
